

Fig: Screenshot of the Bulletin Board.

DESCRIPTION OF THE BULLETIN BOARD:

The information to be displayed on the Bulletin Board must follow following Rules:-

- 1) Approximately 320 characters can be accommodated on this Bulletin board. So, any character beyond that limit may not be visible.
- 2) The information must be enclosed inside curly braces i.e. '{example, this will be seen on the Bulletin board.}'
- 3) Anything written anywhere beyond these brackets will not be visible on the Bulletin board.
- 4) The Notice remains on the Bulletin board for Only 10 seconds and repeats after all notices are displayed.
- 5) The brackets must be present in pairs otherwise the program may behave in an un-expected manner.
- 6) The Data to be Notified on Bulletin Board must be specified in the "textdata.txt" file contained in the same folder or sever space as that of Bulletin Board.swf.
- 7) For Better user Interface on a network use the object code of Bulletin Loader.html; specify all the files i.e. Bulletin board.swf , Bulletin Loader.swf ,textdata.txt in the same folder.

Examples of Creating a text on Bulletin Board –

1) { Here you can

Specify

text in any

way

you

like.

}

2) { But

One constrain

is that you

cannot use

{ }

in

the string

you

specify. }

3) { Curly braces are used as Delimiters }

> **Save the File with the name 'textdata.txt' in the same folder as that *.swf file**
